**To: All Diesel Service Dealers and Central Distributors**

**Subject: Warning Tag**

We are introducing the enclosed warning tag to be fastened to all Bosch pumps after repair and before return to the customer. This tag advises the installer of the injection pump that he must pre-lube the pump before installation on the engine to prevent damage on start-up. It also warns the installer that any locked timing device must be disabled after installation, also to prevent pump damage.

Please use this tag on all Bosch injection pump assemblies which you service to help prevent pump damage during re-installation on the engine. These tags are available through the normal channels under the part number "WARN TAG 1" and are available in packets of 25 pieces at \$1.25 per packet.

Sincerely,

Albert C. Krenz
